Education

Bachelor of Computing (Honours), Software Design

Queen's University

Kingston, ON

Experience

Software Engineer Intern

June 2026 – August 2026

Pinnacle IBP

Dubai, UAE

- Centralized management of **100+ client records** by developing CRM software with **3+ workflows** used across **5+ team members**, improving visibility and consistency in client operations.
- Improved software maintainability by testing existing solutions and restructuring inefficient workflows, enabling cleaner and more adaptable future feature development.

Technical Support Intern

June 2024 – August 2024

Tech Mahindra

Dubai, UAE

- Improved system response efficiency by **15%** by analyzing **10,000+ performance records** to identify operational bottlenecks and recurring performance issues.
- Reduced issue-resolution time by troubleshooting enterprise software with engineering teams, accelerating technical escalation and problem resolution.

Web Developer

June 2026 – Present

Queen's UX Club (QUX)

Kingston, ON

- Improved access to club resources by maintaining and enhancing the QUX website, supporting events and digital initiatives across multiple portfolios.
- Reduced information fragmentation by developing systems to centralize emails, contacts, and organizational data across club teams.

Co-Chair

May 2025 – Present

QHacks

Kingston, ON

- Delivered operations for a national hackathon serving **500+ participants** by coordinating **15+ vendors**, **50+ volunteers**, multiple venues, and 48-hour event logistics.
- Improved cross-functional execution by leading strategic planning and coordinating portfolio teams across operations, partnerships, technology, and participant experience.

Lead International Student Ambassador

April 2025 – Present

Queen's University

Kingston, ON

- Improved onboarding and engagement for **100+ international students** by leading mentorship, recruitment, and transition programming.
- Expanded prospective-student outreach by representing Queen's University through campus tours, recruitment events, and international student programming.

Projects

SwingIo – Golf Coaching Platform

- Generated automated golf-swing feedback by developing computer-vision workflows for live and recorded footage, enabling swing-phase analysis and technique scoring.
- Improved coaching specificity by building motion-analysis and ball-tracking workflows that identify improvement areas and surface actionable video clips.

DeepShield – Anti-AI Photo Checker | [GitHub](#) | [Demo](#)

- Enabled users to verify image authenticity by building a full-stack platform with **Next.js**, **TypeScript**, and **Tailwind CSS** for signing, validating, and evaluating digital images.
- Detected pixel-level tampering by implementing **SHA-256 hashing** and signed PNG metadata verification, with AI-image detection as a fallback for unsigned files.

UniPulse – Ambassador Operations Dashboard

- Improved ambassador operations supporting a global community of **50,000+ students** by building a centralized dashboard for administrative workflows and team information.
- Streamlined payroll and recordkeeping by consolidating ambassador activity, operational records, and administrative data into a single internal tool.

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Technologies: Next.js, Tailwind CSS, JUnit, WordPress, Computer Vision

Tools: Git, VS Code, Eclipse, Google Cloud Platform, Android Studio
