Education

Bachelor of Computing (Honours), Software Design

Queen's University

Kingston, ON

Work Experience

Teaching Assistant – CISC 204 Logic for Computing

Queen's University

Sep. 2026 – Present

Kingston, ON

- Support undergraduate students during tutorials by breaking down discrete mathematics and computing concepts and answering technical questions.
- Evaluate coursework and provide feedback on students' mathematical reasoning, problem-solving approaches, and technical accuracy.

Software Engineer Intern

Pinnacle IBP

Jun. 2026 – Aug. 2026

Dubai, UAE

- Developed CRM software to manage **100+ client records**, building **3+ workflows** used by a **5+ member team** to organize client information and day-to-day operations.
- Tested existing CRM functionality and reworked inefficient workflows to simplify maintenance and support future feature development.
- Worked directly with business stakeholders to understand operational needs, turn them into CRM features, and prioritize improvements based on team requirements.

Technical Support Intern

Tech Mahindra

Jun. 2025 – Aug. 2025

Dubai, UAE

- Analyzed **10,000+ performance records** to identify system bottlenecks and recurring issues, contributing to a **15% improvement** in response efficiency.
- Troubleshoot enterprise software issues alongside engineering teams and helped escalate technical problems for faster resolution.
- Reviewed recurring technical incidents to identify common support issues and highlight areas where internal processes could be improved.

Extracurricular Experience

Co-Chair

QHackz

May 2025 – Present

Kingston, ON

- Lead operations for a national hackathon with **500+ participants**, coordinating **15+ vendors**, **50+ volunteers**, multiple venues, and logistics for the 48-hour event.
- Coordinate planning across operations, partnerships, technology, and participant experience teams to keep event preparation on schedule.

Web Developer

Queen's UX Club (QUX)

Jun. 2026 – Present

Kingston, ON

- Maintain and improve the QUX website, keeping club resources accessible and supporting new digital initiatives as they are launched.
- Build internal tools that bring emails, contacts, and organizational information into one place for easier access across club teams.

Lead International Student Ambassador

Queen's University

Apr. 2025 – Present

Kingston, ON

- Lead mentorship, recruitment, and transition programming supporting **100+ international students** as they prepare for and begin university.
- Represent Queen's at campus tours, recruitment events, and outreach programs while answering questions from prospective and incoming international students.

Projects

SwingIO – Golf Coaching Platform

- Developed computer-vision workflows that analyze live and recorded golf swings, identify swing phases, score technique, and generate personalized feedback.
- Built motion-analysis and ball-tracking features that highlight areas for improvement and surface relevant coaching clips for users.

DeepShield – Anti-AI Photo Checker

GitHub | Demo

- Built a full-stack image-authenticity platform using **Next.js**, **TypeScript**, and **Tailwind CSS** to sign, validate, and evaluate digital images.
- Implemented **SHA-256 hashing** and signed PNG metadata verification to detect pixel-level changes, alongside AI-image detection for unsigned files.

Technical Skills

Languages: Python, Java, C, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Technologies: Next.js, Tailwind CSS, JUnit, WordPress, Computer Vision

Tools: Git, VS Code, Eclipse, Google Cloud Platform, Android Studio
